ELSEVIER

Bone 33 (2003) 979–985

BONE

www.elsevier.com/locate/bone

SUBJECT INDEX FOR VOLUME 33

Actin ring
Formation, in osteoclasts, cyclodepsipeptides and destruxins effects on, 443
Adiponectin
As determinant of bone mineral density and visceral fat a, 646
Aging
Age-related bone loss and bone development and, 387
Bone formation and rest-inserted mechanical loading and, 946
Bone marrow stromal cells life span and senescence and, 919
Bone mass decrease effects, 919
Alendronate
Exercise and, bone and physical performance in postmenopausal women, 132
Postmenopausal osteoporosis and, 90
Residual effects on bone mass after withdrawal, postmenopausal women, 301
Angiogenic factor
Expression during distraction osteogenesis, 889
Apert syndrome
Ser250Trp substitution in mouse fibroblast growth factor receptor 2 and, 169
Apoptosis
Dysregulated, Apert syndrome pathogenesis and, 169
Osteoblast, inhibition by thrombin, 733
Zoledronic acid cytotoxic activity in osteosarcoma and, 216
Arthroplasty
Total hip, local osteoporosis after, etidronate effects against, 144
Articular cartilage
Function of, histomorphology and mechanobiology, 1

Biochemical markers
Bisphosphonates effects in postmenopausal osteoporosis prevention, 150
Bone metabolism, in bone marrow edema syndrome of hip, 346
Bone modeling, gender, puberty, and vitamin D effects on, 242
Biochemistry
Endochondral bone formation, gene expression profile in, 46
Biomechanical testing
Bone strength assessment, enterocystoplasty effects, 549
Finite element modeling for bone strength predictions, comparison with quantitative CT, 744
Fracture healing, homologous growth hormone acceleration of, 628
Bisphosphonates
Antiresorption action of, mechanisms of, 805
Bone mineralization effects, 960
Paget's disease, induction and remission duration determinants, 831
Postmenopausal osteoporosis and, 90
Postmenopausal osteoporosis prevention and, 150
Body mass
Muscle strength and, bone strength effects in development and, 317
Bone atrophy
Mechanical consequences of, 937
Bone chemical markers
Glucocorticoid effects on bone turnover, minerals, and, 779
Bone density
Genetic variation and quantitative trait loci localization, 540
Bone destruction
In multiple myeloma, tumor proliferation and, 283
Bone development
Craniofacial, *Fgfr* mRNA isoforms in, 14
Bone disease
Metastatic, IL-8 effects, 28
Bone formation
Basic fibroblast growth factors and estrogen anabolic effects, osteopenic ovariectomy, 380
Bone morphogenetic protein 2-induced, placental growth factor in stem cells and
Calcium absorption and excretion and, Perspective, 259
Endochondral, gene expression profile for, 46
Endochondral, hedgehog signaling family role in, 899
Insulin-like growth factor I role during, 660
Oscillating fluid flow effects on gap junction and, 64
Bone fragility
Bone remodeling and, in osteoporosis, Perspective, 457
Bone geometry
Cortical density and, between prepuberty and young adulthood, MRI comparison study, 771
Bone healing
Homologous growth hormone acceleration of, 628
Bone histology
Ostoclastogenesis in fibrous dysplasia of bone and, interleukin-6 expression and, 434
Bone histomorphometry
16α-hydroxysterone effects, postmenopausal women, 124
Bone lengthening
Osteogenic protein-1 effects on distraction osteogenesis and, 248
Bone loss
Age-related, bone development and, male mice, 387
Corticosteroid-induced, clodronate preventive effects, DXA and quantitative ultrasound analysis, 575
Glucocorticoid-dependent, lovastatin and, 652
Glucocorticoid-induced, vascular endothelial growth factor role in, 869
Immobilization and, S12911–2 reduction effects, 115
Isoflavone and calcium for protection against, 597
Bone marrow edema syndrome
Of hip, bone metabolism biomarkers in, 346
Bone marrow stromal cells
Aging effects on life span and senescence of, 919
Differentiation of, insulin-like growth factor-I and, 80
Bone mass
Alendronate and exercise effects on, in postmenopausal women, 132
Alendronate residual effects on after withdrawal, postmenopausal women, 301

8756-3282/03/$ – see front matter © 2003 Elsevier Inc. All rights reserved.
doi:10.1016/S8756-3282(03)00392-2

Hormone replacement therapy withdrawal effects on, 159
Insulin and human parathyroid hormone effects on, 108
Insulin-like growth factor-I role in maintenance, 80
Osteoporosis, parathyroid hormone and, 372
Physical fitness and, prepubescent football players, 853
Reductions in, excessive remodeling and, Perspective, 457
Bone metabolism
Biochemical markers of, in bone marrow edema syndrome of hip, 346
Bone strength assessment, enterocystoplasty effects, 549
Bone mineral content
Status of, ethnic differences in, 620
Bone mineral density
Collagen type I α 2 gene association with, 614
In fibrous dysplasia, pamidronate effects, 582
Genetic and environmental determinants of, 839
Genetic contribution of, 179
Homocysteine, folate, and vitamin B_{12} relation to, in postmenopausal women, 956
Hormone replacement therapy withdrawal effects on, 159
Ibandronate effects on, in Klinefelter's syndrome, 589
Quantitative trait loci for, age, gender, and body mass effects on, 308
Reference standards in adult baboons by sex and age, 877
Sciatic nerve section effects on, 927
T869C TGF β polymorphism association with, postmenopausal women, 335
TNF receptor associated factor-interacting protein gene and, 237
Tropical spastic paraparesis and myelopathy, 192
Visceral fat and, adiponectin as determinant of, 646
Bone mineralization
Bisphosphonate treatment effects, 960
Bone modeling
Biochemical markers of, gender, puberty, and vitamin D effects on, 242
Bone morphogenetic protein
Angiogenic factor expression during distraction osteogenesis and, 889
Cyclic stretch effects on differentiation and synthesis, ossification of spine ligaments and, 475
Fracture healing and, 362
Bone morphogenetic protein-2
Endochondral bone formation and, 46
Placental growth factor in mesenchymal stem cells, 426
Bone remodeling
Bone mass reductions and, Perspective, 457
Fracture risk in trabecular bone, simulated aging for estimation of, 229
Ibandronate effects on, in Klinefelter's syndrome, 589
Osteoclast autocrine regulation in control of, 206
Bone resorption
Antiresorption action of bisphosphonates, mechanisms of, 805
Human chaperonin 60 stimulation of, 419
IL-8 and, breast cancer metastases to bone, 28
Leptin as determinant of, postmenopausal women, 847
Oscillating fluid flow effects on gap junction and, 64
Bone strength
Body mass and muscle strength effects on, growth and, 317
Enterocystoplasty effects on assessment of, 549
Vertebral, finite element modeling as predictor of, comparison with quantitative CT, 744
Bone structure
Failure, microcracks and, 197
Insulin and human parathyroid hormone effects on, 108
Bone transplantation
Allogenic, cryopreservation with dimethyl sulfoxide effects, 352
Bone turnover
Biomarkers of, circulating osteoprotegerin in women during gonadotropin-releasing hormone agonist treatment and, 860
Bone turnover
Calcium absorption and excretion and, Perspective, 259
Glucocorticoid effects on, 779
Hormone replacement therapy withdrawal effects on, 159
Bone turnover markers
Dietary calcium intake and, during pregnancy, 606
Breast cancer
Metastases to bone, IL-8 expression and, 28
Osteolytic bone metastases in, osteoclasts differentiation and, 798
Brittle bone disease
Temporary, overview and management of, infants, Editorial, 466

Calcium
Absorption and excretion, bone turnover and, Perspective, 259
Bone response to jumping in children and, 533
Dietary intake, bone turnover markers and, during pregnancy, 606
Calcium deficiency
Vitamin K/vitamin D and, in osteopenia, 557
Calcium flux
Bone remodeling and, Letter, 269
Calcium homeostasis
Bone support of, 264
Callus
Fracture, bone morphogenetic proteins and, 362
Calvarial cell
Fetal rat, endothelin-1 effects on osteoprogenitor proliferation and differentiation, 673
Cancellous bone
Insulin and human parathyroid hormone effects on mass and structure, 108
Cartilage
Galanin/galanin receptor-1 expression during fracture repair and, 788
Celiac disease
Screening for, in patients referred for bone densitometry, 970
Chaperonin 60
Bone resorption stimulation and, 419
Chemotherapy
Zoledronic acid cytotoxic activity in osteosarcoma and, 216
Child abuse
Temporary brittle bone disease and, presentation and management of, Editorial, 466
Children
Bone geometry and cortical density, between prepuberty and young adulthood, MRI comparison study, 771
Bone mass and physical fitness in, prepubescent football players, 853
Bone response to jumping, 533
Cholesterol
16α-hydroxysterone effects, postmenopausal women, 124
Chondrocyte
Galanin/galanin receptor-1 expression during fracture repair and, 788
Growth, connective tissue growth factor role, dexamethasone and, 694
Primary, hypertrophic markers in, cyclic tensile strain and hydrostatic pressure effects, 685

Clodronate
Analgesic effects, 567
Corticosteroid-induced bone loss and, DXA and quantitative ultrasound analysis, 575
Collagen expression
Type I, connective tissue growth factor expression in cartilage association with, 911
Collagen type I α 2 gene
Bone mineral density and, 614
Computer simulation
Fracture risk in trabecular bone, simulated aging for estimation of, 229
Connective tissue growth factor
Chondrocyte growth and, dexamethasone and, 694
Expression in cartilage association with type I collagen expression, 911
Cortical bone
Hormone replacement therapy effects on, postmenopausal women, 330
Cortical density
Bone geometry and, between prepuberty and young adulthood, MRI comparison study, 771
COX-2 upregulation
In osteoblasts, nuclear factor-κB and, 399
Craniofacial base
Bone development, *Fgfr* mRNA isoforms in, 14
Craniosynostosis
Ser250Trp substitution in mouse fibroblast growth factor receptor 2 and, 169
Cryopreservation
With dimethyl sulfoxide, allogenic bone transplantation and, 352
Cyclodepsipeptides
Actin ring formation in osteoclasts and, 443
Cyclooxygenase-2
Bone formation in mechanical loading and, 399
Deletion in bone marrow cells, effects on osteoclasts in breast cancer, 798
Cyclosporine A
Osteoclast generation from peripheral blood monocytes and, 711
Cytokine
Interleukin-12, osteoclast formation in bone marrow cells and, 721

Death receptor-5
TNF-family proteins/receptors expression and function in osteoblasts and, 760
Destruxins
Actin ring formation in osteoclasts and, 443
Dexamethasone
Connective tissue growth factor effects on chondrocyte growth and, 694
Endothelin-1 effects in osteoprogenitor proliferation and differentiation in fetal rat calvarial cell and, 673
1α,25-Dihydroxyvitamin D_3
Ion channel activity in osteoblasts, 71
Dual-energy X-ray absorptiometry (DXA)
Bone mineral density reference standards in adult baboons by sex and age, 877
Clodronate prevention of corticosteroid-induced bone loss and, 575
Dysplasia
Fibrous, bone mineral density in, pamidronate effects, 582
Fibrous, of bone, osteoclastogenesis in, IL-6 expression and, 434

Editorial
The lesson of temporary brittle bon disease: all bones ar not created equal, 466
Endothelin-1
Osteoprogenitor proliferation and differentiation, in fetal rat calvarial cell, 673
Enterocystoplasty
Bone strength assessment effects, 549
Epidemiology
Bone mineral density, genetic and environmental determinants of, 839
Celiac disease screening, in patients referred for bone densitometry, 970
17β-Estradiol
Bone, uterus, and serum cholesterol effects, postmenopausal women, 124
Estrogen
Basic fibroblast growth factors and, anabolic effects, osteopenic ovariectomy, 380
Ovariectomy and, osteoprogenitors effects, 822
Ethnicity
Parathyroid hormone, vitamin D, and bone mineral status differences and, 620
Etidronate
Local osteoporosis after total hip arthroplasty, 144
Exercise
Alendronate and, bone and physical performance in postmenopausal women, 132
Bone response to jumping in children and, 533
Endurance, trabecular bone microarchitecture and, 485
Speed of sound measurement in third metacarpal bone and, thoroughbred racehorses, 411
Extracellular fluid calcium ion concentration
Bone support of, 264
Extracellular matrix
Articular cartilage function and, Review Article, 1

Familial studies
Bone mineral density, genetic and environmental determinants of, 839
Fetus
Immobilization, temporary brittle bone disease and, Editorial, 466
Intrauterine skeletal growth, maternal protein deficiency effects, 100
Fibroblast growth factor receptor
Craniofacial bone development and, 14
Fibrous dysplasia
Bone mineral density in, pamidronate effects, 582
Finite element modeling
Bone strength predictions and, comparison with quantitative CT, 744
Mechanical consequences of bone atrophy, 937
Trabecular bone fracture, geometric nonlinearity importance in, 494
Fluorochrome
In situ chemistry of osteoporosis and, 415
Fracture
Bone loss and, alendronate effects, 90
Fatigue, speed of sound measurement in third metacarpal bone and, thoroughbred racehorses, 411
Subsequent, after prevalent vertebral fracture, 522
Trabecular bone, finite-element simulations of, geometric nonlinearity importance in, 494
Fracture healing
Bone morphogenetic proteins and, 362
Homologous growth hormone acceleration of, 628
Insulin-like growth factor I effects, 660
Fracture repair
Galanin and galanin rceptor-1 expression during, 788

Fracture risk
Microdamage accumulation and, 197
Trabecular bone, simulated aging for estimation of, 229

Galanin/galanin receptor-1
Expression during fracture repair, 788
Gap junction
Oscillating fluid flow effects on, 64
Gender
Biochemical markers of bone remodeling and, 242
Gene expression
Adult-onset growth hormone deficiency, growth hormone replacement therapy effects, 638
In endochondral bone formation, 46
Gene mutation
Craniofacial bone development, *Fgfr* isoforms and, 14
Genetic studies
Bone mineral density, genetic and environmental determinants of, 839
Bone mineral density, *N*-ethyl-*N*-nitrosourea mutagenesis and, 179
Collagen type I α 2 gene, bone mineral density and, 614
Genetic variation
Quantitative trait loci localization and, bone density, 540
Genome screen
Bone mineral density quantitative trait loci, age, gender, and body mass effects on, 308
Glucocorticoids
Bone loss induced by, vascular endothelial growth factor and, 869
Bone turnover, minerals, structure and mechanical properties and, 779
Gonadotropin-releasing hormone agonist treatment
Circulating osteoprotegerin during, bone turnover and, 860
Growth factors
Basic fibroblast, anabolic effects, osteopenic ovariectomy, 380
Insulin-like, stromal cells differentiation and, 80
Growth hormone
Homologous, fracture healing acceleration and, 628
Growth hormone deficiency
Adult-onset, growth hormone replacement therapy effects on, 638
Growth hormone replacement therapy
Adult-onset growth hormone deficiency and, 638

Hedgehog signaling family role
Endochondrial bone formation and, 899
Hip
Bone marrow edema syndrome of, bone metabolism biomarkers and, 346
Total arthroplasty, local osteoporosis after, etidronate effects against, 144
Histomorphometry
Articular cartilage function and, Review Article, 1
Fracture healing, homologous growth hormone acceleration of, 628
Hormone replacement therapy effects on cortical bone in postmenopausal women, 330
Homeostasis
Calcium, bone support of, 264
Hormone replacement therapy
Cortical bone effects, postmenopausal women, 330
Withdrawal, bone mass/bone turnover effects, 159
Hormones
Steroid, vitamin D modulation of ion channel activity in osteoblasts and, 71
Human chapronin 60
Bone resorption stimulation and, 419
Hyaluronic acid
Osteoarthritis effects, 703
Hydroxyapatite
In situ chemistry of osteoporosis and, 415
16α-Hydroxysterone
Bone, uterus, and serum cholesterol effects, postmenopausal women, 124
Hypertrophic markers
In primary chondrocyte, cyclic tensile strain and hydrostatic pressure effects, 685

Immobilization
Bone loss and, S12911–2 reduction effects, 115
Immunohistochemistry
Connective tissue growth factor expression in cartilage association with type I collagen expression and, 911
Immunohistochemistry
Fracture callus, bone morphogenetic proteins and, 362
Infants
Brittle bone disease, temporary, presentation and management of, Editorial, 466
Infection, bacterial
Functional MHC class II molecule expression in osteoblasts and, 812
Inflammation
Insulin-like growth factor I effects on bone formation and, 660
Insulin
Human parathyroid hormone and, cancellous bone mass and structure effects, 108
Insulin-like growth factor-I
Bone formation and, 660
Bone marrow stromal cell differentiation and, 80
Interleukin-6
Osteoclastogenesis in fibrous dysplasia of bone and, 434
Interleukin-8
Breast cancer metastases to bone and, 28
Interleukin-12
Osteoclast formation in bone marrow cells, 721
Isoflavone
Calcium and, bone loss prevention and, 597

Jumping
Bone response to, in children, 533

Klinefelter's syndrome
Ibandronate effects on bone mineral density and bone remodeling in, 589

Leptin
Bone resorption and, postmenopausal women, 847
Limb salvage
Cryopreservation with dimethyl sulfoxide in allogenic bone transplantation and, 352
Linkage disequilibrium
TNF receptor associated factor-interacting protein gene effects on bone mineral density, 237
Lovastatin
Glucocorticoid-dependent bone loss and, 652

Magnetic resonance imaging
Bone geometry and cortical density comparison, between prepuberty and young adulthood, 771
Major histocompatibility complex
Class II, expression in osteoblasts, bacterial infection effects, 812
Mandible
Osteoclast culture system development, 38

Mechanical loading
Articular cartilage function and, Review Article, 1
Cyclic tensile strain and hydrostatic pressure effects on hypertrophic markers in primary chondrocyte, 685
Rest-inserted, bone formation and, aging effects, 946
Mechanical stress
Cyclic stretch and posterior longitudinal ligament ossification, 475
Mechanotransduction
Articular cartilage function and, Review Article, 1
Mesenchymal cells
Lovastatin role in osteonecrosis and osteoporosis, 652
Placental growth factor in, bone morphogenetic protein 2 induction of, 426
Metacarpal bone
Third, speed of sound measurement in, thoroughbred racehorses, 411
Metastases
Breast cancer, IL-8 expression and, 28
Microarchitecture
Trabecular bone, endurance exercise effects on, 485
Microdamage accumulation
Bone structural failure and, 197
Microspectroscopy
Synchrotron infrared, in situ chemistry of osteoporosis analysis, 415
Mineralization
Bisphosphonate treatment effects, 960
Molecular chaperons
Human chapronin 60, bone resorption stimulation and, 419
Multiple myeloma
Bone destruction in, tumor proliferation and, 283
Muscle strength
Body mass and, bone strength effects in development and, 317
Mutagenesis
N-ethyl-*N*-nitrosourea, bone mineral density and, 179
Myelopathy
HTLV-I-associated, osteoporosis in, 192

Nandrolone decanoate
In situ chemistry of osteoporosis and, 415
Neridronate
Osteoporosis in postmenopausal women, 342
***N*-ethyl-*N*-nitrosourea mutagenesis**
Bone mineral density and, 179
Nuclear factor-κB
COX-2 upregulation in osteoblasts and, 399

Olpadronate
Paget's disease, induction and remission duration determinants, 831
Ossification
Posterior longitudinal ligaments, cyclic stretch and, 475
Osteoarthritis
Hyaluronic acid effects in, 703
Osteoblast
Apoptosis, inhibition by thrombin, 733
Functional MHC class II molecule expression in, bacterial infection effects, 812
Oscillating fluid flow effects on gap junction and, 64
Osteoarthritic, hyaluronic acid effects on, 703
TNF-family proteins and receptors in, 760
Vitamin D modulation of ion channel activity in, 71
Osteoclast
Autocrine regulation, bone remodeling control and, 206
Bone-resorbing, destruxins, cyclodepsipeptides effects on actin ring formation in, 443
Culture system development, mandible and erupting teeth and, 38
Formation of in bone marrow cells, interleukin-12 and, 721
Generation from peripheral blood monocytes, resting T cells and, 711
Osteoclast differentiation
Osteolytic bone metastases in breast cancer and, 798
Osteoclastogenesis
In fibrous dysplasia of bone, IL-6 expression and, 434
Osteocyte
Density, osteonal morphology and remodeling effects, histomorphometric analysis of, 753
Oscillating fluid flow effects on gap junction and, 64
Osteogenesis
Distraction, angiogenic factor expression during, 889
Distraction, osteogenic protein-1 effects on, 248
Osteogenic protein-1
Distraction osteogenesis and, 248
Osteolysis
IL-8 role in breast cancer metastases to bone, 28
Osteonal morphology
Osteocyte density effects on, histomorphometric analysis of, 753
Osteopenia
Age-related bone loss and bone development and, male mice, 387
Bone loss after immobilization and, S12911–2 effects, 115
Vertebral fracture in postmenopausal women, raloxifene effects, 293
Vitamin K and D supplementation effects on, 557
Osteoporosis
After total hip arthroplasty, etidronate effects against, 144
Bisphosphonates effects on bone mineralization and, 960
Bone mineral density and, genetic and environmental determinants of, 839
Bone remodeling and bone fragility in, Perspective, 457
Gene expression profile and, 46
Hormone replacement therapy withdrawal effects on bone mass and, 159
In HTLV-I-associated myelopathy/tropical spastic paraparesis, 192
Mechanical consequences of bone atrophy and, 937
Neridronate effects, postmenopausal women, 342
Postmenopausal, alendronate effects, 90
Postmenopausal, prevention of, bisphosphonates role, 150
Sciatic nerve section effects on bone mineral density and, 927
In situ chemistry of, synchrotron infrared microspectroscopy analysis of, 415
T869C TGF β polymorphism and, 335
Trabecular bone, transmission electron microscopy analysis of, 270
Type II, age-related bone loss and bone development and, male mice, 387
Vertebral deformity as predictor of vertebral fracture and, 505
Vertebral fracture, subsequent fracture risk after, 522
Vertebral fracture in postmenopausal women, raloxifene effects, 293
Osteoprogenitors
Ovariectomy effects on, 822
Osteoprotegerin
Circulating, during gonadotropin-releasing hormone agonist treatment, bone turnover and, 860
Osteosarcoma
Zoledronic acid cytotoxic activity in, 216
Osteotomy
Tibial, osteogenic protein-1 effects on distraction osteogenesis and, 248
Ovariectomy
Basic fibroblast growth factor anabolic effects after, 380
Osteoprogenitors effects, 822

Paget's disease
Bisphosphonate therapy, induction and remission duration determinants, 831

Bone remodeling disruptions and, osteoclast autocrine regulation and, 206
Pain
Clodronate analgesic effecs, 567
Pamidronate
Bone mineral density in fibrous dysplasia and, 582
Paraparesis
HTLV-I-associated, osteoporosis in, 192
Parathyroid hormone
Anabolic and catabolic effects of, 372
Insulin and, cancellous bone mass and structure effects, 108
Status of, ethnic differences in, 620
Parathyroid hormone-related protein
Osteoclast culture system development and, 38
Physical activity
Bone mass and, exercise effects, prepubescent football players, 853
Bone response to jumping in children and, 533
Physical performance
Alendronate and exercise effects on, in postmenopausal women, 132
Pregnancy
Dietary calcium intake and bone turnover markers during, 606
Intrauterine skeletal growth, maternal protein deficiency effects, 100
Prostaglandin E_2
Osteoclast differentiation in osteolytic bone metastases in breast cancer and, 798
Protein deficiency
Maternal, intrauterine skeletal growth and, 100
Puberty
Biochemical markers of bone remodeling and, 242

Quantitative trait loci
Bone mineral density, age, gender, and body mass effects on, 308
Localization of, bone density and, 540
TNF receptor associated factor-interacting protein gene effects on bone mineral density, 237

Raloxifene
Vertebral fracture in postmenopausal women, 293
Rheumatoid arthritis
TNF-family proteins/receptors expression and function in osteoblasts and, 760

S12911–2
Bone loss after immobilization and, 115
Sciatic nerve section
Bone mineral density effects, 927
Ser250Trp substitution
In fibroblast growth factor receptor 2, craniosynostosis and, 169
Skeletal aging
Bone mineral density reference standards in adult baboons by sex and age, 877
Skeletal disorders
Bisphosphonates in, mechanisms of antiresorption action, 805
Skeletal growth
Intrauterine, maternal protein deficiency effects, 100
Speed of sound
Measurement in third metacarpal bone, thoroughbred racehorses, 411
Stability theory
Trabecular bone fracture, geometric nonlinearity importance in finite-element simulations, 494
Stratification
Bone mineral density quantitative trait loci, age, gender, and body mass effects on, 308
Stromal cells
Differentiation of, insulin-like growth factor-I and, 80
Synchondrosis
Craniofacial bone development and, 14

T cell
Osteoclast generation from peripheral blood monocytes and, 711
T869C TGF β polymorphism
Osteoporosis in postmenopausal women and, 335
Thrombin
Osteoblast apoptosis inhibition by, 733
TNF-family proteins/receptors
In osteoblasts, 760
Tooth
Eruption, osteoclast culture system development, 38
Trabecular bon
Microarchitecture of, endurance exercise effects on, 485
Trabecular bone
Failure, finite-element simulations of, geometric nonlinearity importance in, 494
Fracture risk, simulated aging for estimation of, 229
Osteoporotic, transmission electron microscopy analysis of, 270
Transmission disequilibrium test
Bone mineral density and collagen type I α 2 gene, 614
Transmission electron microscopy
Osteoporotic trabecular bone analysis, 270
Treadmill running
Trabecular bone microarchitecture effects, 485
Tumor growth
Bone remodeling due to ovariectomy and, in multiple myeloma, 283

Ultrasound
Quantitative, clodronate prevention of corticosteroid-induced bone loss and, 575
Speed of sound measurement in third metacarpal bone, thoroughbred racehorses, 411
Uterus
16α-hydroxysterone effects, postmenopausal women, 124

Vascular endothelial growth factor
Glucocorticoid-induced bone loss and, 869
Vertebra
Bone strength, finite element modeling as predictor of, comparison with quantitative CT, 744
Vertebral deformity
As predictor of vertebral fracture, osteoporosis and, 505
Vertebral fracture
Postmenopausal women, raloxifene effects, 293
Severity, subsequent fracture risk adn, 522
Vertebral deformity as predictor of, osteoporosis and, 505
Visceral fat
Bone mineral density and, adiponectin as determinant of, 646
Visceral pain
Clodronate effects, 567
Vitamin D
Ion channel activity in osteoblasts, 71
Status of, ethnic differences in, 620
Supplementation, osteopenia and, 557
Vitamin K
Supplementation, osteopenia and, 557

Women
Pregnant, dietary calcium intake and bone turnover markers during, 606

Women, postmenopausal
Alendronate and exercise effects on bone and physical performance in, 132
Alendronate effects on osteoporosis in, 90
Alendronate residual effects on bone mass after withdrawal, 301
Bone resorption, leptin as determinant of, 847
Homocysteine, folate, and vitamin B_{12} relation to bone mineral density, 956
Hormone replacement therapy effects on cortical bone in, 330
16α-hydroxysterone effects on bone, uterus, and cholesterol in, 124
Neridronate effects on osteoporosis in, 342
Osteoporosis prevention, bisphosphonates role, 150
T869C TGF β polymorphism association with osteoporosis in, 335
Vertebral fracture, raloxifene effects, 293

Zoledronic acid
Cytotoxic activity in osteosarcoma and, 216
